

INSURANCE CLAIM POLICY GUIDE

COVERAGE ELIGIBILITY

- ? A claim is payable only when the policy status is 'ACTIVE' or 'IN FORCE'.
- ? Premium status must be 'CURRENT', 'PAID', or equivalent good standing at the time of loss.
- ? Coverage must be confirmed for the reported peril before a claim can be approved.
- ? A claim amount above the stated coverage limit is not payable without a documented endorsement.
- ? The claimant must exceed the deductible before a loss becomes payable.

DOCUMENTATION REQUIREMENTS

- ? Property damage claims should include scene photos and at least one repair estimate.
- ? Receipts or proof of ownership should support contents claims above \$2,500.
- ? A police report is required for theft, vandalism, and collision losses.
- ? Witness statements or medical notes should support any claim with injuries or third-party involvement.
- ? Missing essential documentation can justify a conditional decision or human review.

DAMAGES AND SETTLEMENT

- ? Emergency mitigation costs can be reimbursed when invoices and loss details support the expense.
- ? A small gap between the claimed amount and the available estimate is normal.
- ? A gap above 25% between the claimed amount and the documented estimate requires additional scrutiny.
- ? Claims using more than 80% of available coverage should be escalated for senior review.
- ? Cleanly documented claims with prompt reporting can be approved without escalation.

FRAUD AND ESCALATION INDICATORS

- ? Late reporting after 30 days is a fraud indicator and requires added scrutiny.
- ? Multiple prior claims within 3 years increase fraud and severity risk.
- ? Missing police reports, inconsistent item values, or thin documentation can require human review.
- ? A combination of late reporting, weak documentation, and high claim severity should be escalated.
- ? Injury claims and third-party disputes should be escalated when liability is unclear.

DECISION THRESHOLDS

- ? Reject a claim when the policy is inactive, premium is not current, or coverage is not confirmed.
- ? Reject a claim when the claimed amount exceeds the coverage limit.
- ? Reject a claim when the claimed amount does not exceed the deductible.
- ? Use a conditional or human review decision for incomplete documentation, estimate mismatches above 25%, multiple prior claims, injuries, or third-party complexity.
- ? Approve claims that are covered, timely reported, well documented, and financially consistent with the evidence.
